Data Protection Breach & Non Compliance Procedure

A data protection breach refers to a breach of security which has led to the destruction, loss, alteration, unauthorised disclosure of, or access to, personal data.

The head teacher will ensure that all staff are made aware of, and understand, what constitutes a data breach as part of their training.

All staff, governors and trustees must be aware of what to do in the event of a DPA / GDPR breach.

The 'Data Breach Flowchart' outlines the process.

The 'Data Breach Form' must be completed and updated as the process progresses.

Most breaches, aside from cyber criminal attacks, occur as a result of human error. They are not malicious in origin and if quickly reported are often manageable.

Everyone needs to understand that if a breach occurs it must be swiftly reported.

Examples of breaches are:-

- Information being posted to an incorrect address which results in an unintended recipient reading that information
- Loss of mobile or portable data device, unencrypted mobile phone, USB memory stick or similar
- Sending an email with personal data to the wrong person
- Dropping or leaving documents containing personal data in a public place
- Personal data being left unattended at a printer enabling unauthorised persons to read that information
- Not securing documents containing personal data (at home or work) when left unattended
- Anything that enables an unauthorised individual access to school buildings or computer systems
- Discussing personal data with someone not entitled to it, either by phone or in person. How can you be sure they are entitled to that information?
- Deliberately accessing, or attempting to access or use personal data beyond the requirements of an individual's job role e.g. for personal, commercial or political use. This action may constitute a criminal offence under the Computer Misuse Act as well as the Data Protection Act.
- Opening a malicious email attachment or clicking on a link from an external or unfamiliar source, which leads to school's equipment (and subsequently its records) being subjected to a virus or malicious attack, which results in unauthorised access to, loss, destruction or damage to personal data.

What to do?

Being open about the possible breach and explaining what has been lost or potentially accessed is an important element of working with the ICO and to mitigate the impact. Covering up a breach is never acceptable and may be a criminal, civil or disciplinary matter.

Report the breach to the Data Controller, Data Protection Compliance Manager and DPO as soon as possible, this is essential.

The breach notification form will be completed and the breach register updated.

If the personal data breach is likely to result in a risk to the rights and freedoms of the data subjects affected by the personal data breach notification to those people will be done in a co-ordinated manner with support from the DPO.

The breach report will be within 72 hours of becoming aware of the breach.

It may not be possible to investigate the breach fully within the 72 hour timeframe. Information about further investigations will be shared with the ICO with support from the DPO.

Procedure – Breach notification data controller to data subject

For every breach the school will consider notification to the data subject or subjects as part of the process. If the breach is likely to be high risk they will be notified as soon as possible and kept informed of actions and outcomes.

The breach and process will be described in clear and plain language.

If the breach affects a high volume of data subjects and personal data records, the most effective form of notification will be used and discussed with the Data Controller with support from the Data Protection Compliance Manager and DPO.

Advice will be taken from the ICO about how to manage communication with data subjects if appropriate.

A post breach action plan will be put into place and reviewed.

Evidence Collection

It may be necessary to collect information about how an information security breach or unauthorised release of data occurred. This evidence gathering process may be used as an internal process (which can include disciplinary proceedings), it may be a source of information for the ICO, it could also be used within criminal or civil proceedings.

This process will be conducted by a suitable member of school staff, which may be the Data Management Compliance Officer or Data Protection Officer, but will be determined depending on the nature of the breach.

Guidance may be required from external legal providers and police may be involved to determine the best way to secure evidence.

A record of what evidence has been gathered, stored and secured must be available as a separate log. Files and hardware must be securely stored, possibly in a designated offsite facility.
